**STARTUP PARTNERSHIP
PROGRAM INTERNATIONAL**

VISION

In order to increase the wealth and knowledge of all associates, the vision of SPPI is provide to opportunities for each associate to develop their skills and knowledge in a variety of areas while also collaborating with other associates in pursuit of a common goal.

We believe that by providing these opportunities, we can help each associate grow and achieve their full potential.

MISSION

There are so many startups that have been started in the past and many are successfully running across glob. The investors are making huge money out of it. But a common person just uses their product and services, that's it. Here we are on the mission to pass such startup benefits to a common person just using our product and services. We will offer them a partnership in such startups just using and promoting our product and services from new startups and as well as running startups also. Total 20% partnership will be offered from all the projects to the partnership qualifier mentioned in the PPT . That will be a turning point in a common person's life and that will be a financial freedom in his/her life. That's our mission behind this technology based startup to make a common person financially free.

DECENTRALIZATION

In Blockchain, Decentralization Refers To The Transfer Of Control And Decision making From A Centralized Entity (Individual, Organization, Or Group Thereof) To A Distributed Network. Decentralized Networks Strive To Reduce The Level Of Trust That Participants Must Place In One Another, And Deter Their Ability To Exert Authority Or Control Over One Another In Ways That Degrade The Functionality Of The Network.

Benefits Of Decentralization -

-  **Provides A Trusty Environment**
-  **Improves Data Reconciliation**

COPY TRADING

Copy trading enables individuals in the financial markets to automatically copy positions opened and managed by other selected individuals. Unlike mirror trading, a method that allows traders to copy specific strategies, copy trading links a portion of the copying trader's funds to the account of the copied investor.

These systems can be automated and can be integrated with online forex brokers or exchange platforms. Forex trading robots are automated software programs that generate trading signals. Most of these robots are built with MetaTrader, using the MQL scripting language, which lets traders generate trading signals or place orders, and manage trades.

**OUR FIRST PRODUCT IS
